SWINE RAISING AS A BUSINESS

Breeder Should Not Make It Secondary to Farming Operations—Why Many Men Fail.

In a recent discussion of the points to be observed by a hog breeder, W. F. McFadden, secretary of the American Poland China Record association, said:

The hog man should make hog raising his principal business; he should not make it secondary to his farming operations, and it should be the central idea around which revolve all his active business operations. A hog man should be a hog man 365 days in the year. He criticized those breeders whose enthusiasm was short-lived, urging them to take pride in their business and in every little detail concerning it. He thought that crates should be made light, good and attractive and that stationery should be neat, to the point and indicative of the methods of doing business. He thought good stationery added dignity to the business and made a good impression.

The best laurels are Rohendipolis (round leaved) and Latifolia (large leaved).

These are harder than the common laurel, which suffers in very extreme winters.

Holly, box and yew should not be ignored, because no matter what may be the soil or situation, with fair treatment they will thrive.

There is considerable variety in the hollies, especially in the color of the foliage. It should be remembered in planting them that there are sexes in the shrub and only the females bear berries. The physiologist has not been able to explain why some kinds should be sexual and others have the organs of reproduction as separate plants.

Among other evergreens are bush and tree ivies and the Berberis family and the Golden Privets are charming bush trees and make a very neat diversion in a garden, but they are not strong enough for a boundary fence.

Of course we cannot do without evergreens. They give elevation and break up the flat surfaces where many low things are planted. The Lawson Cypress in some of its varieties are very effective and the brooms in variety charming.

LOCATION OF APPLE ORCHARD

Best Soil for Fruit is Deep, Well-Drained Clay Loam—Few Other Most Important Details.

If we are thinking of planting an apple orchard there are a great many things we need to consider. First of all, the soil. Apples will grow on many types of soil, but a really good apple soil is a deep, well-drained clay loam, says a writer in an exchange.

Borings to a depth of three or four feet should be made to determine the subsoil. Clayey or stone clay subsoils are good; sandy subsoils are objectionable.

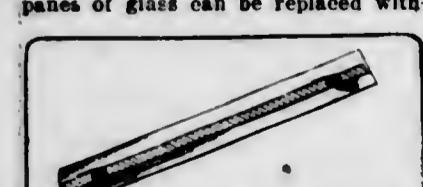

The location of the orchard is very important. Some slope is desirable, although it should not be so steep as to induce surface washing. We need also to be able to drive a horse and wagon over it, so as to give the necessary sprayings and to pick the fruit. The direction of slope is not so important, and we may say that all slopes are about equally good. I would plant one-year budded trees and no others, if I could get those well grown. I would like to have them three to four feet in height. It has often been said that such trees may be suitable for states farther south, but they will not do well here in New England. This is not the case, and the best orchards that I have seen have been developed from such trees.

FOR GLAZING A GREENHOUSE

New Jersey Man Has Improved Method of Putting in Panes of Glass Without Any Disturbance.

The Scientific American in describing and illustrating a greenhouse glazing method, the invention of F. Van Asche of Jersey City, N. J., says:

The invention provides a roof formed by panes of glass which is smoothed between the sash bars receiving the glass, and in which the panes of glass can be replaced with

Improved System of Greenhouse Glazing.

out disturbance to the panes lying between the same sash bars. A channel bar is provided between every two consecutive panes of glass lying between the same pair of sash bars. This channel bar is supported by the sash bars and constitutes a bed for putting with the juxtaposed ends of the panes are sealed.

Apples for Exhibition. For exhibition at the fairs, apples should be picked when ripe, as carefully as possible, wrapped in soft paper, and not allowed to become bruised or injured in any way.

Fruit for Market. If one is to find a market for fruit when there is an abundance, it must be carefully picked and graded and put on the market in neat packages.

DAIRY

SEPARATOR IS GREAT ASSET

Advent of Machine Was Big Boost for Dairy Business—Cause of Much Inferior Butter.

(By C. H. LANE, Dairymen. Copyright, 1914.)

In early days farmers set milk on kitchen or pantry shelves to raise cream. After standing twelve to twenty-four hours the cream was skimmed with the skimmer and set aside in a cool place, usually the cellar. Less than one-half to three-fourths of the cream was thus secured. When enough had accumulated a churning was made. Later milk was put in "deep setting" cans kept in well or spring water, and after 12 hours the cream was skimmed, or, in the more improved cans, the skim milk was drawn from the bottom, leaving the cream in the can. Here again one-third of the cream was left in skim milk to be fed to pigs. Thirty years ago the first cream separator was made in this country. The principal of the separator is based on the specific gravity of liquids. As the separator bowl revolves at about six thousand revolutions per minute the heavier portion of milk, skim milk, is thrown outside by centrifugal force and discharged, while the lighter portion, cream, is thrown to the center of the bowl and discharged through separate tubes. The advent of separators was a great boost for the dairy business, as it separated practically all cream from milk, preventing waste and making it possible to feed sweet skim milk to stock.

Talking about feeding and care, he said that a hog should be well bred and that improvement was the result of good care and good feed. There was no success without these and good judgment in selection.

SOUTHDOWN SHEEP IN FAVOR

One of Most Popular Breeds and Quite Extensively Bred—Furnished Good Quality of Fleeces.

The Southdown is one of our popular mutton breeds of sheep and is quite extensively bred. The breed is

Types of separators on the market today are legion. It is estimated the sales of separators in the United States amounts to 175,000 per year. These range in capacity from two hundred pounds of milk per hour in the small hand separators to four thousand two hundred pounds in the big power machines and cost from one to six hundred dollars.

By turning slightly the "cream screw" in a separator the cream can be made thick or thin or rich or poor in butter fat, depending on the amount of skim milk incorporated with it. For example, common table cream of 20 per cent fat or a very rich thick cream contains from fifty to sixty per cent butter fat.

One would think a clearer and better flavored cream would be produced by the introduction of the separator; but, as a matter of fact, the flavor and sanitary qualities of separator cream produced on the average farm are not as good as before, and the quality of butter made in creameries from this separator cream is inferior, largely because the separators are not kept clean.

TESTING MILK WITH NEEDLE

Large Drop Will Adhere to Point of Piece of Steel If There Has Been No Adulteration.

Good milk should look white, with a yellowish tinge. Bluish milk is poor in fatty matter. Good milk is little sticky when stirred, and lathers. If water has been put into it it does not lather. If you wish to be sure that the milk is of the proper richness, take a long needle, see that it is clean and

dry, and dip it into the milk an inch or so below the surface. Withdraw it, and if the milk be pure a large drop will adhere to the needle and hang there for some time. But if the milk drops from the needle quickly it is very thin.

Testing Milk With Needle.

It is difficult to invent a good excuse for not dragging. Used at the right time and with proper frequency on practically all types of earthy soils and those of the clayey or rolling sections, the drag will make roads smooth, hard and convex—the three fundamental characteristics of an ideal dirt road.

In the spring, summer and fall there are many crops for pasturing hogs, but during the winter the crops to select from are limited. On almost every farm the production and keeping of hogs in winter is expensive, and generally it is not profitable for the reason that large quantities of corn are fed without products of green crops. More winter grazing is needed, which many crops are adapted for.

The most reliable are rape, rye, wheat and barley. For grazing purposes these pasturing crops for hogs should be sown on specially well-drained and prepared land, that is either rich or has received a liberal application of manure. Good winter pasture is not obtained except on the best-drained lands.

It should not be forgotten that milk is a germ-carrier, and that, even though pure, it may be infected and cause disease.

Have a Silo. If a cow could talk and you would ask what she would have to eat she would answer: "Give me a juicy, succulent food and I will give twice as much milk." The succulent food is supplied in the summer by a good pasture and in the winter by silage. All farmers should have a silo.

Cause of Scours. Scours is usually caused by having the milk too cold or too hot, or feeding irregularly. Filthy quarters and dirty pails will also cause scours.

Profitable Side Line.

One factor about the sheep business is worthy of special emphasis. This industry is one of the most profitable side lines that can fit the operations of the general farm. Sheep require little attention during the sowing, haying, cultivating or harvesting seasons when the time of the farmer is needed elsewhere. It is during periods when the farmer has plenty of leisure that the necessity arises for according the flock additional care and attention.

For exhibition at the fairs, apples should be picked when ripe, as carefully as possible, wrapped in soft paper, and not allowed to become bruised or injured in any way.

Fruit for Market.

If one is to find a market for fruit when there is an abundance, it must be carefully picked and graded and put on the market in neat packages.

FOR BETTER ROADS

MAKING A SPLIT LOG DRAG

Anyone Can Make One to Cost From Almost Nothing to \$2.50, Depending on Materials Used.

(By C. H. LANE, Dairymen. Copyright, 1914.)

A subscriber in Latah county, Idaho, asks us to give him a plan for making a split log drag for working the roads in his county, and also wants to know how to use one, says the Western Farmer.

The drag may be made of a log, say eight feet long and 12 inches through, split in the middle, or of two pieces of sawed oak or other substantial wood, 2 by 8 inches. After a log is split, giving two flat, faced slabs, bore three two-inch holes in each slab, as shown in drawing; connect the slabs, facing the same direction, with three stakes or rounded 3 by 3s long enough to leave three feet of space between the slabs after the connecting pieces have been driven into the holes. Two or three planks can be nailed to these pieces, affording a place for the driver to stand, and, at the same time, strengthening the drag. Use a chain or strong rope for attachment to the double-tree. Supposing the drag to face west, and assuming that a chain is used, fasten one end of the chain to or around the left hand outside connecting brace, letting the chain pass over the top of the slab. If attached to the face of the slab, near the left hand end, the chain would interfere with the movement of dirt toward that end of the drag. The drag is run at an angle of about 45 degrees, so that dirt can be thrown toward one side. The other end of the chain must be fastened to the face of the front slab near where the right hand connecting piece comes through, and not around the connecting piece, as it is in the illustration.

Shoe about three feet of the bottom edge (right hand side) of the front slab with a piece of iron or steel of the following dimensions: 14 inches long and a half inch thick, with one edge sharp or beveled. Put it on securely, letting the sharp edge project about half an inch below the edge of the slab. This shoe will enable the drag better to shave the surface and cut down the hard ridges which are usually met on roads that have not been kept smooth. A good drag will cost from almost nothing to \$2.50, depending on the ma-

terials and construction, and last five to ten years. Anybody can make one.

Roads should be dragged 10 or 12 times a year. The time is after each soaking rain, so that the drag will form a smooth mud coat on the surface. When the frost is leaving the ground is an excellent time; the drag should be in use from then until winter.

The work does not interfere with ordinary farming operations, as when it is the right time to drag the soil is too wet or the conditions unsuited for many kinds of field work. It is difficult to invent a good excuse for not dragging. Used at the right time and with proper frequency on practically all types of earthy soils and those of the clayey or rolling sections, the drag will make roads smooth, hard and convex—the three fundamental characteristics of an ideal dirt road.

THURSDAY, MAY 28, 1914.

Entered at the Greenville, Ky., postoffice as second-class matter.

We are authorized to announce B. Thomas Jr., a candidate for Congress in this the 11th Congressional district, subject to the rules of the Democratic party. Primary August 1st.

Huddy having failed to go to the front, the front is accommodately coming to him.

NUNIVISION OF PENNSY., Palmer and Pinchot in Pennsylvania recall the perspicacious Peter Piper, who picked a peck of pickled peppers.

ONE hopeless cynic remarks that he would not mind an automobile accident so much if the "first aid to the injured" amateurs did not insist on experimenting on him.

MEXICO has reason to congratulate itself. There was a time when if any nation had weakened itself as Mexico has done it would have been torn to pieces and benevolently assimilated by the neighbors.

At the circus which he visited recently President Wilson fed the elephant a peanut, this being the only official recognition the G. O. P. has received from the administration thus far.

Instead of dissolving the "A B-C" mediation board in the event of its labors being rendered needless by events, President Wilson should ask it to persuade the laundries not to starch negligee shirt bosoms.

INTELLIGENT sweet girl graduates are preparing to reject the expensive graduation garment. This further proof that wonders never cease shows there is still hope that the stiff masculine collar will be abolished some day.

EVERYBODY is quarreling about Senator LaFollette's use of 305 pages of the Congressional Record for his speech, but no one has volunteered to read the speech to see if it is worth the space.

HON. WILLIAM O'CONNELL BREWERY, senior Kentucky Senator, died in Washington City at 9:15 o'clock last Saturday night, after an illness of a few days from a complication of troubles. He was a brilliant lawyer and a successful man in politics, being the only Republican who had been Governor of the State and elected to the U. S. Senate. The body was brought to his home at Frankfort, where interment was made Tuesday afternoon, many notable personages from all over the country being in attendance.

D. Ward King in Idaho.

Lewiston, Idaho, May 23, 1914.
Orin L. Roark,
Editor Record.

Greenville, Ky.
Our campaign for log dragged roads in the territory surrounding Lewiston closed this afternoon with an address in this City. The series of lectures delivered by Mr. D. Ward King of Missouri have aroused and enthused the community. Scores of farmers have promised to build split log road drags.

On Tuesday of next week a Good Road Day will be observed throughout the county; the firm of Hanes & Wallace, at Waha, has donated logs for those who wish to build drags.

Our people are quite generally expressing the opinion that a movement has been started which will result in the continuous and substantial improvement of our highways at a nominal cost.

Very truly yours,
MRS. JESSIE ADAM
Asst. Secy. Lewiston Com. Club.

Vote for the bonds and help the school children.

The Order of the Non I. W. W.

We understand that there will be an organization established in Greenville soon, which will be known as the order of the Non I. W. W. This will include all unorganized persons and all those who have retired from active business life. There are quite a number of such characters now in Greenville, and they have thought best to organize in order to protest themselves against any infringement that may be made against their privileges and rights by the influence of industry and labor. We understand that a temporary meeting has been held which called for a meeting of organization. The following charter members will be included in the roll call, it is thought:

C. C. McDonald, Jas. W. Oates, Chas. Giger, Joe Cornett, E. L. Yous, Harry Weir, John T. Reynolds, Sr., John Coombs, S. J. Landis, J. C. Kelley, Ed. Paxton, Geo. Eves, Sr., T. B. Pannell, Amos Jenkins, E. J. Patterson, Sr., J. N. Allen, John S. Miller, W. F. Morgan, J. A. Williams, W. G. Duncan, Sr., James Poag, Sr., J. H. Martin, Babcock Head, Rip Jenkins, Bill Richardson, Geo. Lovell, H. C. McCracken, W. B. Davis, C. V. Martin, Rev. W. C. Hayes, Tom Finley, R. H. Lyon, J. H. Pittman, C. W. Roark, A. B. Garnett, Nat. Mathis, Ed. Roark, R. T. Martin, W. H. Reynolds, Wm. Fox, Joe Chatham, Rev. R. C. Love, W. A. Wickliffe, Rev. W. H. Woodson, Rev. G. B. McDonald, James Bogges, Jim Poag, Jr., John Shutt, T. E. Sumner, Jim Barkley, C. P. Morton, Ed. Oates, Bill Price, Wm. Weborn.

Of this number there will be four over 80 years old, nineteen over 70, twelve over 60 and the balance varying from 40 to 60. It is quite likely that C. C. McDonald will be made President of the order, on account of his long service and experience in the principles of the order.

John S. Miller is slated for vice President and Jas. W. Oates, second vice President. E. L. Vontz is slated for Secretary on account of his parliamentary knowledge of the workings of the order.

Jim Poag, Jr., is slated for treasurer, Wm. Fox the keeper of the seal, S. J. Landis, Sergeant at Arms, Harry Weir, Door keeper, W. H. Woodson, chief Chaplain, C. P. Morton and John Shutt, field marshals and soliciting agents, T. B. Pannell, general organizer. The following named persons are slated as board of Directors, Jas. Poag, Sr., Joe Cornett, Barbour Head, Jas. Boggess and Chas. Green. After a full suite of officers are elected and installed, a petition will be gotten out and sent to the Hon. R. Y. Thomas, Congressman from the Third district of Kentucky requesting him to have the Non I. W. W. order of Greenville, Ky., to be exempted with the farmers and labor unions from the rulings of the anti-trust law now being considered by congress. The order will have no other motive or purpose than to protect the safety and welfare of its members. It will be entirely non-political and will be without any religious discrimination and shall be kept under the rulings of moral persuasion. Its chief aim and object will be to secure peace, rest and repose. The Hon. T. O. Jones assisted by W. O. Belcher will likely be made legal advisers. Dr. J. W. Koontz will be chief medical adviser. John X. Taylor and R. O. Pace will get the job for writing insurance policies for the members of the order to protect them from the demands of labor and toil. We understand that there are quite a number of people in the county who are willing and anxious to join the order. No doubt but what the order of the Non I. W. W. will rapidly grow and become an organization of power and influence and we think will become a credit to Greenville.

ZENO.
Mr. W. G. Duncan, Sr., was in Chicago several days last week on business.

Calomel, Calomel, you cannot stay for LIV-VER-LAX has shown us an easier way. Ask G. E. Countzler.

Monday was county court day but farmers were too busy to come to town in large numbers.

Porch and lawn furniture: swings, settees, chairs, rockers, old Hickory furniture, at Roark's.

**Stomach Trouble;
Wholly Restored!**

Mrs. Wilson
Ressto St.
Toledo, Ohio
writes:
"I feel like
a new person.
I have no
more heavy
feeling, no
more pain,
don't belch up
gas, can eat
most anything
without it
hurting me. I
want to be
working at
the time I
have gained
twelve four
pounds."

"People that
see me now
Mrs. Wilson Robison,
and saw me two months ago seem
astonished. I tell them Peruna did
it. I will say it is the only remedy
for spring and all other ailments."

"No argument is needed for Peruna.
Just get a bottle and try it. If
you have catarrh of the stomach you
have a serious trouble. If you want
to find a remedy it would be very easy
to make the experiment. But you will
likely take Peruna a week you will
feel better, then you will need no testimonials on the part
of other people or arguments to convince
you. Until you try Peruna, however, all the testimonials in the
world and arguments, however logical,
will not move you. Just one trial of Peruna will convince you."

Persons who object to liquid medicines
can now obtain Peruna Tablets.

Death of Richard J. Williams.

Mr. Richard J. Williams, aged 70 years, died at his home at White Plains at 8 o'clock last Sunday night, after an illness that for some weeks had confined him to his room, cancer of stomach having developed. Deceased was a veteran of the civil war, being a valiant soldier in the 17th Kentucky, seeing service at Fort Donelson, Nashville, Perryville and Shiloh. He was well known throughout this section, being a man of many likable characteristics. Funeral services were held at the home at 2 o'clock Monday afternoon, conducted by Rev. Foshier, a minister of the Universalist church, of Hopkinsville, of which faith deceased was a faithful adherent. Surviving are his wife, a son, Clarence, and daughter, Mrs. D. C. Harrison, of White Plains, and Mr. Chas. A. Williams, of this city. Interment was in Concord graveyard, and a host of friends attended the services.

Car Drivers Are Caught.

Revenue inspectors for the state have been active past several days among automobile owners, and all over the state have been picking up people who have failed to keep their cars licensed. In some cases license tags have been found that have expired two years ago, and a few were running cars that never had been licensed. Altogether several thousand dollars will eventually be recovered, it is thought, as the penalties add considerably to the funds. From what has been discovered, greater activity will follow, and every section of Kentucky will be put under the closest scrutiny.

Typewriter ribbons, paper, supplies of all kinds for any machine can be had at this office.

We are prepared to furnish you paint in any shade wanted.

ROYAL BAKING POWDER

Is the Housewife's Greatest Help.

WHAT so tempting to the laggard appetite as a light, flaky, fruit short cake or a delicate hot biscuit?

Royal makes the perfect short cake, biscuit and muffin, and improves the flavor and healthfulness of all risen flour-foods.

It renders the biscuit, hot-bread and short cake more digestible and nutritious, at the same time making them more attractive and appetizing.

Royal Baking Powder is indispensable for the preparation all the year round of perfect foods.

TO THE OLD CONFEDERATE FLAG.

O, blood bespattered banner, on you no more will gleam
At dawn upon the battlefield, the sun's first rosy beam:
You no more the soldier in grand pa-

For you no more in danger the prisoner fondly yearns;
No more when night time darkens the deadly scenes of war
Will you in martial glory upon the breezes blow.
Though gory, torn and tattered your times of service past,
You bring again the memory of days too bright to last.
For when the merry May time ends with Memorial Day
You mingle with the grave-grass o'er one who wore the gray.
And those unused to warfare stand silently and gaze.
Upon your world-be splendor and dream of other days.

Local Mention.

Where are the vacation hopes of yesterday?

Vote for the school bond issue on June 6.

Mr. Felix Martin was in Dawson Springs last Sunday.

Read the franchise ordinance in this issue of this paper.

Mr. R. H. Bridges is in Dawson Springs on extended stay.

Saturday is a legal holiday, and will be observed by the banks.

Mr. C. G. Bridges of Drakesboro was here Monday, and drove home in a new Ford touring car.

Messrs. T. N. Belcher and R. O. Pace were in Bowling Green on political affairs the latter part of the week.

Messrs. L. W. and Fred Irvin and families motored to Madisonville last Sunday spending the day with relatives.

Oh, you Calomel get out of the way and let LIV-VER-LAX do the work. Purify vegetable. Ask G. E. Countzler.

There will be a decoration of the soldiers graves in the Evergreen and the old cemetery Saturday and it is hoped there will be a generous response to the call for flowers.

Try Heinz bulk mince meat; nothing better for pies. C. M. Howard & Co.

Masonic Social.

The annual social gathering of the Masons and their families last Friday night was a most enjoyable affair. The exercises at the court house pleased everyone, all addresses being enjoyed, and the refreshments that were served at the lodge room were satisfying in every way. The attendance was large, many persons being present from other lodges in the county.

Messrs. Bernie and Leslie Shutt and Misses Aileen Morton and Marguerite Duncan motored to Dawson Springs last Sunday.

Electio n to Vote Bonds.

The board of trustees of graded school district No 14 have called an election for Saturday, June 6, to permit the issuance of bonds to raise funds to repair the old school building. Additional room is badly needed, and something must be done. Every patron of the school, and every progressive person should vote for the bonds.

Messrs. W. H. Brizendine, Leslie Hale and Wm. Pannell were in Dawson Springs last Sunday.

IT'S GREAT FOR HAWKY BOWELS AND STOMACHS.

We want all people who have chronic stomach trouble or constipation, no matter of how long standing, to try one dose of May's Wonder Stomach Remedy—one dose will conquer all. This is the medicine so many of our local people have been taking with surprising results. The most thorough system cleaner we ever sold. May's Wonder Stomach Remedy is now sold here by G. E. Countzler.

Mrs. J. W. Johnson and daughter Eunice are spending a few days with relatives in Kirkmansville.

Mr. Moses R. Glenn, who has been making his home in Dawson Springs for some time, has launched a newspaper, the Tribune, first copy of which appeared last Friday. It is a husky youngster, full of news, and will prove a factor in the advancement of this well known summer resort. Mr. Glenn has many friends in this, his home county, and they wish him greatest success.

Mr. Felix Puryear is home on vacation from Kentucky Military Institute.

Rev. G. P. Dillon and his Sunday-school class are spending the week at Rochester, enjoying camp life and making records as fishermen, several of the boys taking creditable strings of fish.

Mr. Fount Bridges, of Depoy has joined the ranks of the autoists, buying a Ford touring car from Irvin & Gilman this week.

Furniture for hot weather at Roark's.

We had our first real summer day Sunday, when the thermometer climbed to 92 and many people crawled into cellars to evade the heat.

Summer furniture at Roark's.

AN ORDINANCE.

Granting to the Central City, Greenville & Drakesboro Railway the right to construct, maintain and operate a single or double track Electric Railroad in the city of Greenville, beginning at the west corporate boundary line and extending east in the center of Depot Street with a single track with necessary turnouts, to College Street; thence south on College Street as far as Main Cross Street, then Southwest on Main Cross Street approximately 630 feet crossing private property the east side of public square.

Be it further ordained by the Board of Council of the City of Greenville:

Section 1. That the Central City, Greenville and Drakesboro Railway (hereinafter called the Railway) is hereby granted the right to construct, maintain and operate a single or double track Electric Railroad in the City of Greenville over and along the following route, namely:

Beginning at the west corporate boundary line of said City in Depot Street, thence East over said Street to College Street, thence South on College Street to Main cross Street, thence Southwest on Main Cross Street approximate 420 feet East of the East side of the Public Square, and including the triangular piece of ground approximate 260 feet by 150 feet by 105 feet, which lies in the bend of Main Cross Street approximate 420 feet East of the East side of the Public Square. The Railroad to continue from the South side of Main Cross Street on private right of way to its terminal, or if so desired to stop its line, at the South side of Main Cross Street and erect its depots on the triangular lot above mentioned.

Section 2. The said Railway shall have the right to construct and maintain switches, turnouts or meeting points whenever and wherever same may be proper and suitable for the operation of said Railway.

Section 3. Said Railway shall be operated by electric power, and the authority hereby granted shall embrace and include the right to erect in and along the Streets aforesaid such poles and wires as may be necessary and suitable for the construction, maintenance and operation of said poles or wires, so that said section as amended shall read as follows:

"Said railroad shall be operated by electric power, and the authority hereby granted shall give power to said railroad company to erect in and along the streets aforesaid such poles and wires as may be necessary and suitable for the construction, maintenance and operation of said railroad. Said poles shall be erected at such places and in such manner as the Board of Council may direct, and the location thereof shall at all times be under the supervision of said Board of Council, and under no circumstances shall they be placed in such manner as will interfere with the drainage of said streets, or with travel or traffic along said streets, and shall in all instances be placed between the gutters and sidewalks, and the City of Greenville shall be held harmless against loss or damage of any kind or character, including costs and attorney fee incident to and resulting from any injury to person or property growing out of such condition of said poles or wires."

Be it further ordained that section 4 of said ordinance be amended by striking therefrom the whole thereof and inserting in lieu of said section 4 the following:

"The said railroad track shall be located and constructed in a suitable and proper manner as herein directed, considering always the convenient use of said streets by the traveling public, and in the construction of said tracks said railroad company shall not use less than 70 pound "T" rails, and shall use all other standard material."

Section 5. The Railway shall indemnify and hold safe and harmless the city of Greenville against any claim or claims of persons or property by reason of the construction and operation of said Railway.

Section 6. Grant herein shall be perpetual, but shall not preclude the City of Greenville from granting to another Railway Company, or companies, a right to construct and maintain a railway over other Streets in the City of Greenville.

Section 7. This Ordinance shall take effect and be in force from and after its publication.

Filed April 13, 1914.

Be it ordained by the City Council of the City of Greenville, that section 2 of the ordinance granting to the Central City, Greenville & Drakesboro Railway the right to construct, maintain and operate a single or double track electric railroad over certain streets in the city of Greenville, introduced April 13, 1914, be amended by striking out the whole of section 4 thereof, and inserting in lieu of said section 4 the following:

"That said railroad company shall have the right to construct and maintain switches, turnouts or meeting points in the streets mentioned, whenever and wherever same may be proper and suitable for the operation of said railroad; provided such switches, turnouts or meeting places are constructed at such places on said streets mentioned as will not interfere with public traffic and travel. The track or tracks, switches and turnouts of said railroad company shall not be elevated above the surface of the streets, and the same shall be laid to conform to the established and to be established grades of the streets, and in such manner as to be no impediment to the ordinary use of the streets and the passage of wagons, carriages and other vehicles upon, along or across its tracks, with suitable bridges at all of the gutters so as to permit the free flow of water in and along said gutters, and the said rail-

NOTICE OF ELECTION

Pursuant to an order duly made by the trustees of Greenville Graded White Common School District, number 14, an election will be held at the court house in Greenville, Kentucky, on Saturday, June 6, 1914, between the hours of six A. M. and 4 P. M., at which election the sense of the legally qualified voters of said district will be taken upon the proposition as to whether or not said district shall issue bonds not in excess of the amount authorized by law, and in no event to exceed \$6500.00, for the purpose of building, repairing and equipping suitable buildings for the use of said district.

What you want in paint is one that flows freely from the brush, that spreads evenly, but has enough body to stay spread.

You can shut your eyes and tell from the feel of the brush, as you paint, that

Hanna's Green Seal Paint

is full-bodied, smooth, elastic and tenacious. You can feel it cling to the wood, and in after years you can see it cling.

There is no secret about making good, durable paint. The formula is on every can.

FOR SALE BY

G. M. DEXTER & CO., Greenville, Ky.

Mrs. R. Y. Thomas, Jr., Marrics.

Information was received here a few days ago that Mrs. R. Y. Thomas, Jr., was married in San Marcos, Texas, last week to a Mr. Barbour. At the last term of the circuit court here she was granted a divorce from Hon. R. Y. Thomas, Jr., and her early marriage was a surprise to the people here.

The said railroad company shall indemnify and hold safe and harmless the city of Greenville against loss or damage of every kind and character, including cost and attorney fee, incident to and resulting from any injury to person or property growing out of the construction, maintenance or operation of said railroad.

Be it further ordained that said ordinance be amended by striking therefrom the whole of section 6 thereof and inserting in lieu of said section 6 the following:

"The grant herein shall be perpetual, but shall not preclude the City of Greenville from granting another railroad company, or companies, the right to construct, and maintain a railroad, or railroads, over or along any other street or streets in said city of Greenville, or across any of the streets herein named."

Be it further ordained that said ordinance be amended by striking therefrom the whole of section 7 thereof, and inserting in lieu of said section 7 the following:

"If said railroad company shall not construct said railroad along and over the streets hereinabove named, and have the same in operation with cars running thereon by July 1, 1914, then and in that event this ordinance shall be and become null and void, and said railroad company shall have no rights here under whatever."

Adopted May 10, 1914.

A FIDDLE AND A CIRCUS

By MICHAEL J. PORTER.

The gossips of Groversville had it that Deacon Pegram, widower, and Mrs. Mary Moreton, widow, were engaged to be married.

The gossips were a little premature. The couple had been courting for a year, but they were not engaged yet. With all respect for the widow, it may be said that it wasn't her fault. Deacon Pegram was a careful, prudent man.

When the deacon married he selected a woman who looked so meek and humble that he believed she would not resent a box on the ear occasionally. The first time he started the boxing game he discovered that he had made an awful blunder. It was his ears that got the cuffing. He was, therefore, going slow in regard to the widow.

Both the deacon and the widow were members of the same church, but there was a difference in the way they lived their religions. The deacon believed in all sorts of hell-fires for a man that went out to gather huckleberries on a Sunday, or halted to see the end of a dog fight on any week day, and the widow figured that she could even attend a straw-ride or a barn dance and yet secure her golden harvest when the time came to call for it.

The deacon knew that she had liberal ideas, but he had let that matter alone. All being ready at last, he called to bring about the climax. At the gate he was almost turned to stone. He caught the strains of a fiddle from within the house.

The deacon braced against the shock and knocked on the door.

The widow opened it. She had the fiddle in her hand as bold as brass.

"Why good evening, deacon."

He glared at her in silence.

"I was just practising my exercises. What's the matter?"

"That—that fiddle!"

"Yes, it's a fiddle, and I am going to learn to play. You seem astonished."

"A fiddle here in this house!" he rasped.

"The Widow Moreton doesrending to such depravity? Why—"

"It isn't your point, deacon."

"As the old adage goes, the instrument is what there is wrong about learning to play the fiddle?"

"It is played at dances!"

"If you came here this evening to kick up a fuss over a harmless fiddle, I can go away again!"

"I can, and will! Thank-heaven, it is not too late! We are not pledged!"

"And I, too, am thankful for that!"

And Deacon Pegram stalked out.

After a week he thought to strengthen his position by going to his pastor and asking:

"Pastor, doesn't our religion teach us that the fiddle is a thing to beware of?"

"No, I can hardly say that it does," was the reply.

"And it isn't one of the vices of satan?"

"No more than the piano or the harp."

"But if a woman learns to play the fiddle?" persisted the deacon.

"Many of them do."

"But, pastor, the Bible don't mention that they have fiddles in heaven. It only speaks of harps."

"I know, brother Pegram, but I'm not so sure that they didn't call a fiddle a harp in those ancient days."

The deacon went home and kicked the woodshed door because the dog wasn't handy.

The good man struggled with himself for a couple of days and then decided to meander past the widow's house. He would not stop, but just meander. But he did stop when he reached the gate. He was going right on when he saw that the upper hinge was loose. He was gazing at it when the woman came to the door and said: "Oh, deacon, are you going to take me to the circus next week?"

"Wh-ast!" he shouted; and when she had repeated her query he exclaimed: "The fiddle first and the circus next!"

"But what's the matter with the circus?"

"What's the matter with everybody going to the bottomless pit together? Widow Moreton, this is too much—too much!"

"But I shall go by myself!"

And go she did, when the day came, and the deacon was so mad about it that he wouldn't even stand at his gate and see the elephants go past. He continued mad for three days and then went to his pastor.

"Did you preach a sermon against that circus last Sunday? I was not feeling well, and was not at church."

"Why, no, I didn't," was the reply.

"Did you warn the people that satan was luring them?"

"Brother Pegram, I was there with my whole family!"

"You—you can't mean it!"

"But I do. Yes, we were there and saw both the circus and the menagerie, and if satan was around he was in a back cage somewhere! And I am going to the ball game tomorrow!"

Deacon Pegram walked straight from the pastor's house to that of the Widow Moreton's, and without waiting to remove his hat or sit down he said: "Widow, I love you!"

"Yes?"

"Will you marry a—a fool?"

"Do a fiddle and the circus go with him?" she asked.

"Yes, and mebbe a barn dance!"

"Then I say 'yes.'"

FOOD OF MUCH VALUE

HUMBLE CABBAGE WORTHY OF GREATER CONSIDERATION.

Writer Who Should Know Points Out the Nourishing Qualities of This Vegetable to Those Whom It Agrees.

The ordinary cabbage contains nearly 2½ per cent of protein matter, the chief food principle of meats; about 5 per cent of starches and sugars and digestible fiber; nearly one-half per cent of vegetable fat and some mineral salts. Over 90 per cent is water.

While the nutritive principles contained in cabbage as shown by the above analysis are comparatively small, yet they are considerable, and the vegetable is besides very wholesome for many other reasons, and should on that account form part of all diets.

It is a matter of common knowledge that in diet variety plays a very important part, writes J. A. Husk, M. D., in the Chicago News. Feed the members of your family on the same kind of food day after day and no matter how wholesome they will soon tire of it and will not digest it normally. There is either some psychological basis for this or perhaps a physiological one not yet well understood. Cabbages may be used to furnish variety.

Another factor that makes for wholesomeness in a vegetable like cabbage is that it contains quite a large percentage of mineral salts. These, together with the large residue left by the cabbage in the intestinal tract, stimulate the muscular walls of the latter and in this manner aid in the process of digestion.

Cabbage is obtainable at all seasons of the year and is one of the cheapest vegetables we have. The ways of preparing cabbage are many. It may be boiled or baked. It may be also served as a salad in the form of cold slaw. When subjected to cooking the process should be thorough to render the vegetable tender and digestible. When served raw it should be well washed and cleansed.

Among the many preparations of cabbage a very wholesome one is sauerkraut. In the ripening of sauerkraut large amounts of lactic acid are produced. This process renders the vegetable itself more digestible and the lactic acid germs present are very beneficial to the system. They counteract the decomposition of food in the intestines, thus making sauerkraut actually nutritious. Taken from all points of view cabbage is quite a nutritious vegetable, wholesome, healthful and cheap.

Compote of Pears.

Select firm fruit, not too ripe. Wash them and cut in halves lengthwise, and carefully take out the core. Make a syrup in the proportion of two cups of sugar to one of water. When the syrup is boiling put in the pieces of pears and cook until tender. Take them out with a skimmer and arrange in pyramid form, the stem end upon a pretty dish. Slice an unpeeled lemon very thin and put in the syrup. Let the syrup cool until it thickens. Put the lemon slices over the fruit and pour the syrup over all with the spoonful when a little cool. Place the compote where it will become perfectly cold before serving.

Spiced Raisins.

These are very good, served with cold tongue or sliced ham. Make a syrup of two pounds of brown sugar, a pint of vinegar and a teaspoon of cloves and cinnamon. Tie spices in a bag. When it boils skim carefully and pour over it two pounds of the finest raisins and simmer the whole for an hour, or let them stand until the second day, and then reheat syrup, put in raisins and let them soak where they will keep just below the boiling point, until the raisins are plump and tender, then seal up in glass jars. Prunes can also be used, but must be soaked first.

Coffee Cake.

One cupful of sugar, a half cupful of butter; mix well. Add two well beaten eggs, one-half cupful of raisins seeded and chopped, a half cupful of ground cinnamon, a teaspoonful of ground mace and one of ground cloves. Dissolve a quarter teaspoonful of baking soda in a half cupful of cold coffee and add. Mix well, and lastly stir in lightly two cupfuls of finely sifted flour. This will be found excellent and will keep a long time.

Jelly Fritters.

Make a batter of two eggs, a pint of milk and a pint bowl of flour. Beat it light; put a tablespoonful of lard or beef dripping in a frying pan and add a saltspoonful of salt, making it sizzling hot. Put in the batter by the large spoonful, not too close. When done place on a dolly-covered dish. Put a dessert spoonful of jelly on each fritter.

Yellow Croquettes.

Mix two cupfuls of hot rice potatoes with two tablespoonsfuls of butter, the beaten yolks of three eggs, one-half teaspoonful salt and a dash of cayenne. Shape into tiny croquettes, roll in flour, fry in deep fat.

Pecan Pralines.

Three cups brown sugar, one cup milk, butter size of walnut boiled to soft ball. Add one cup chopped pecans and beat the mixture until it is stiff, then pull into rough bits and put on platters to cool.

THE KITCHEN CABINET

I

T is true that often the things we hope for, fail to put in an appearance, but think of the wonderful compensation we get in the good things that appear so unexpectedly.—Lloyd.

CURATIVE FRUIT JUICES.

In Riley M. Fletcher Berry's work on "Fruit Juices" there are some delicious recipes for the use of fruits and at this season of the year when the blood needs toning after the winter it will be well to observe some of the good uses to which the juices of fruits may be put.

Baked Lemon or Orange.—Bake a lemon or an orange in the oven until soft and eat it hot with or without sugar just before retiring. Skip the evening meal and follow the fruit treatment with a good drink of water. This should be followed up for several nights in succession. This is an excellent remedy for colds.

Cider Egg Nogg.—To one egg whipped and sweetened slightly with sugar add a glass of cider, sprinkle with grated nutmeg and serve with shaved ice or serve hot.

Flaxseed Lemonade.—An old-fashioned and effective remedy for cold is this laxative drink. Pour a quart of boiling water over a cupful of flaxseed. Add the juice of two lemons and sugar as required. Let steep in a covered jar for several hours and drink hot, thinned with boiling water if so desired, just before retiring.

Italian Cure for Malaria.—Slice thin one lemon, rind and all, and place in a saucepan. Over this pour one and a half pints of cold water and cook down to half a pint, then strain through a coarse cloth, so that some of the pulp goes through. Let stand until cool and drink fasting. This should be kept up for several days.

Lemon for Headache.—The juice of a large lemon squeezed into a small cup of strong black coffee with no sugar will often prevent or cure a headache.

Using lemon with tea is not a bad or wise combination as the citric acid of the lemon offsets the tannic acid in the tea, rendering it refreshing and wholesome.

The lemon is valuable for purifying the blood and toning the system. It acts directly on the liver, cools the blood and some physicians claim it drives away typhoid germs.

Next to the citrus fruits the pineapple is found to be most beneficial in its effects on the human system. It is rich in mineral salts and contains an active substance which has the power of digesting proteins.
